

STEP BY STEP GUIDE

THE PERFECT PHOTO CANVAS

Ready to create the perfect Photo Canvas with Canvas Factory? Here we give you a step by step guide for how to make sure your photo canvas turns out perfect every time!

1 SELECT A MATERIAL

Canvas » For a classic look, choose our high-quality 380GSM canvas stretched across a 1.2" frame. Prints are delivered ready to hang. We can offer you the finish you prefer, including a Gallery Wrap (the sides of the frame as a continuation of the image), Solid Colour Wrap (the sides are a solid colour of your choice), or Mirror Wrap (the sides are a mirror of your image). Or, if you have a specific wrapping request, contact us to discuss your requirements.

Acrylic » A lightweight, yet durable plexiglass designed to preserve and enhance your beautiful photos.

HD Metal » Your selected image is printed on stunning metal sheets specially treated to prevent corrosion, ideal for both indoors and outdoors.

2 SELECT STYLE, SIZE AND SHAPE

There are several styles to choose from when it comes to custom photo canvas art. Select from a range of styles, including Single Prints, Split Image Prints, Wall Displays, or Photo Collages. Then decide which size and shape will work best for you in your space. Keep in mind the size of wall space you're working with and browse through some of our real-life customer examples!

3 UPLOAD HIGH-QUALITY PHOTOS

Now for the most important part; your photos! At Canvas Factory, we have a database of 25 million free images you can use to build your gallery at home. Or, if you wish to use photos of your own, just ensure they are high quality and high-resolution photos, otherwise your image may look blurry when it is blown up to a larger size. For the best result, your photos should have 300ppi (pixels per inch). We also want to make sure you choose a brightly-lit photograph without too many dark shadows.

4 HAVE A DESIGNER CHECK YOUR ORDER

Unsure about the quality of your images? For just a few extra dollars, you can have a designer manually check the quality of your photos and make sure that everything looks amazing and is sized correctly. When cropping or editing your images, you might unknowingly crop out important parts of your image or stretch your images so they become blurry. An expert can fix any compositional or editing errors and make adjustments so that each photo looks exactly the way you want it.

5 PLACE YOUR ORDER

That's it! Once you're happy with the dimensions and photo choices for your print, add your order to the cart, enter any promo codes you have, and you're on your way to receiving your high-quality photo prints in no time. We make the process as easy and straightforward as possible so that you can enjoy your photo canvas sooner than ever.
